Hi Abigail,

Following up on a phone call from last week. We're checking in on the status of the NW Byron sewer wetlands permit public notice, but we've had to re-route some sewer on the 6400 Ivanrest property at the residents request.

The amount of wetlands impact is identical to previous, although it did change slightly. I'd like to discuss this with you before we go to public notice as I'd like to avoid any re-noticing later.

Please call when you have a few minutes. Thanks!

Abigail,

That's right – no public notice. Very helpful.

Attached are the revised drawings and written summary. As you'll see, the change is almost imperceptible, but we wanted all teams at EGLE to have the same plans.

Thank you,
Aaron Van Proyen, P.E., PTOE

Hi Aaron,

This project meets a minor project category so it will not be placed on public notice. Please send me the updated plans and a written summary of the new impacts. I can update the draft permit and get that sent out once I have all the information.

Thank you,

Abigail Bultsma |Environmental Quality Analyst
